
INSTRUCTION MANUAL
CHILL PILL^{V2}

IMPORTANT

Please read and understand this manual before attempting to use this pillow. Follow all instructions, guidelines and safety warnings. If you have questions about assembly, operation, servicing or repair, please call Zempire[®] at +1 206 420 0391 or +64 7 848 1610.

INFLATE

Open valve cap and inflate by blowing until the desired comfort level is reached (never inflate using a mechanical air pump). Refit valve cap to seal.

DEFLATE

1. Open valve cap and gently push the one-way flap until it stays in the open position.
2. Roll the pillow from the end opposite the valve, pressing out remaining air.
3. Secure with elastic strap and fit into carry bag with the valve cap refitted.

⚠ IMPORTANT

It is essential to inflate your pillow to a good pressure. Do not over-inflate as this can increase wear and tear. Inflate the pillow enough to be comfortable and allow you to sleep properly.

⚠ CAUTION

In freezing temperatures, it is best to avoid inflating your self-inflating pillow with breath, as moisture can freeze inside it. Your pillow may inflate slower in cold weather.

⚠ IMPORTANT

Always fold the pillow with the sleeping surface facing in to prevent damage to the textured fabric.

STORAGE

We recommend storing your pillow open and inflated rather than compressed in carry bag in a dry place. Storage for a prolonged time in a damp space may cause mildew damage, which our Zempire® warranty does not cover. Never store the pillow wet.

CLEANING PROCESS

Regular cleaning is essential to maintain the quality and durability of your pillow and prevent degradation from substances like food or oils.

- To clean, remove the cover from the inflation bladder by unzipping the side zip and gently pushing the inflation valve cap through the slot in the cover. Reverse to refit cover.
- Hand wash only in a mild soap and water solution.
- Do not bleach. Do not tumble dry. Do not iron. Do not dry clean. Do not machine wash.
- Do not use harsh cleaning chemicals.

Make sure the pillow is completely dry before you store it for long periods (a damp pillow may grow mould on its outer surface).

⚠ WARNING

- Avoid exposing the pillow to Deet-based insect repellents, sunscreen, or chlorine to prevent damage to the fabric.
- Keep the pillow out of reach of pets. Dogs may be tempted to chew on the pillow, while cats may use the pillow to sharpen their claws etc.
- Always transport the pillow in the supplied carry bag to help prevent damage.
- Avoid prolonged exposure of the pillow to direct sunlight, as ultraviolet rays can gradually deteriorate the coated fabric.
- Avoid pressurizing the pillow with high-pressure pumps exceeding 1 PSI.
- Do not use your pillow on rocky or sharp surfaces.
- Do not expose the pillow to flames or sparks.
- Do not use as a flotation device.
- Children must be supervised when using the pillow.
